FUTURE
ENGINEERS

2024 Annual Sponsor Program

About E2 Empowering engineers!

E-squared is a statewide speakers bureau that will connect teachers and schools to practicing engineers for the purpose of teaching students what engineering is and why a career in engineering is so rewarding.

Initially formed by a joint effort of the Illinois Engineering Initiative (IEI) the American Council of Engineering Companies of Illinois (ACEC-IL), our vision is to grow the effort into a multi-organization partnership with engineering firms, agencies and member organizations to offer an Illinois state-wide speaker's bureau for grade schools and high schools to encourage careers in engineering.

E2 is an initiative developed to:

- Promote STEM and engineering as a career path in grade and high schools
- Create and creating more engineers in Illinois
- Consolidate the volunteer efforts of organizations to engage students in engineering (Power in numbers)
- Combined volunteer base of agencies and organizations

INSPIRE FUTURE ENGINEERS

MAKE AN IMPACT. Become a Sponsor!

With the engineering industry facing a generation long workforce shortage, it is vital that engineers come together to encourage students to choose a career in our profession. We have curricula designed for grade school, middle school, and high schools to provide an engaging program for students.

Your sponsorship will help provide training materials for our volunteers and operating expenses for the initiative.

HELP US raise
\$30,000 to support
engaging, inspiring,
and encouraging
students grades
5th-12th and help them
DISCOVER a career
in engineering!

2024 ANNUAL SPONSORSHIP PROGRAM

INSPIRE
